Are immunizations important to you?

Perhaps you or someone you know was touched by a vaccine-preventable disease.

Perhaps you are the parent of an immuno-compromised child whom you want to protect.

Perhaps you were unsure about vaccines before and now want to share the message that vaccines are safe & effective.

Whatever the reason, we would like to connect with you.

The Immunize Kansas Coalition (IKC) is looking for a team of parents to champion immunizations in their communities and across Kansas.

If you're interested in joining this team, complete the interest survey at {survey monkey link} and someone from IKC will reach out to you.
