

Immunize Kansas Coalition Celebrates Accomplishments in Annual Report

July 25, 2024

Immunize Kansas Coalition (IKC) celebrates key accomplishments and metrics throughout the past fiscal year, July 1, 2023 - June 30, 2024, in their [annual report](#). These achievements were made possible through the combined efforts of our immunization community. It also acknowledges the significant partnerships, sponsors, and grant funders, both in Kansas and nationwide, who have supported their mission throughout the year.

The report outlines a variety of outreach efforts, including statewide local in-person events, as well as digital and print campaigns. In her “Letter From The Executive Director”, Geovannie Gone shared, “By engaging with local leaders, healthcare providers, and community organizations, we have created a network of trusted voices advocating for immunizations.”

Featured efforts also include collaborations with national partners, Vaccinate Your Family through the Vaccination Community Navigator Trainings, and their continued learning and participation through nationwide conferences, such as the National Conference for Immunization Coalitions and Partnerships (NCICP).

Also found in the report, are personal testimonies that highlight the importance of IKC’s mission to protect all Kansans from vaccine-preventable diseases.

From national to community contributions, the coalition continues to strengthen vaccine confidence and rates through education, awareness, and collaborative partnerships. IKC looks forward to continued work with peer coalitions across the country in the year ahead!
